DECLARATION OF CONFORMITY

We hereby declare that this air conditioner complies with the essential requirements and other relevant provisions of Directive 2014/53/EU.

The declaration of conformity can be found on the website www.olimpiasplendid.it

1-TECHNICAL SPECIFICATIONS

Model:WIRELESS KIT

Transmission standard:.....IEEE 802.11b/g/n

Antenna type:PCB Printed Antenna

Wireless frequency band: .. 2400–2483.5 MHz

Max. transmitted wireless power: ... < 20 dBm

BLE frequency band:2402–2480 MHz

Max. transmitted BLE power: < 10 dBm

Operating temperature:0°C–45°C /
32°F–113°F

Operating humidity: 10%–85%

Power supply: DC 5 V/300 mA

Compatible operating systems: ..iOS, Android

2-WARNINGS

- 1 - Not all versions of iOS and Android are compatible with the application. The Manufacturer declines all responsibility for any problems attributable to such incompatibility.
- 2 - The smart kit supports WPA-PSK/WPA2-PSK/WPA3-PSK only. Do not use any other type of encryption.
- 3 - Make sure that the camera of the device on which you want to use the application has at least 5 million pixels to read the QR code.
- 4 - Variations in the network conditions may cause the request to time-out. If this happens, it is necessary to repeat the network configuration procedure.
- 5 - Variations in the network conditions may cause the request to time-out during the check process.

We shall not be held liable for problems caused by the internet line, wireless router or smart devices.

Contact the original supplier for assistance.

- 6 - In order to improve performance, the App may be subject to updates without prior notice. The configuration procedure may differ slightly to that described in the manual.
- 7 - When installing and using the KIT, observe the minimum distances specified for installation in the appliance into which it is integrated. Always maintain a minimum distance of 20 cm between the KIT and the user during use.

3-DOWNLOAD AND INSTALL THE APP

- 1 - Open “**App Store**” or “**Google Play**”.
- 2 - Search for the “**Os home**” application.
- 3 - Download the application.

Alternatively, you may prefer to scan the following QR codes:

4-REGISTER THE USER

- Make sure that the device is connected to a wireless router.
- Make sure that the wireless router is connected to the internet before attempting to register the user and configure the network.
- For more information about the registration process, refer to the wireless manual at the website www.olimpiasplendid.it

5-CONFIGURE THE NETWORK

5a- Wireless

Make sure that the Android or iOS device only connects to the wireless network that you want to configure.

Make sure that the wireless function of the Android or iOS device works correctly and that it automatically reconnects to the original wireless network.

When the air conditioner enters “AP” (Access Point) mode, it cannot be controlled by the remote control.

Make sure that the wireless network to which the appliance will connect is 2.4 GHz.

- 1 - Turn on the device and enter “AP” mode as described in the corresponding instruction manual.
- 2 - Access the wireless settings on the phone, search for a network with a name that begins with “smart_xxx”, or a name customised by the manufacturer, and connect to the hotspot.
- 3 - Once connected to the hotspot, return to the Os Home app to continue the pairing process.
- 4 - The app will automatically send the home wireless network credentials to the appliance, which will automatically connect to the network.
- 5 - Once the upload is complete, the name of the connected appliance can be changed (max 64 characters); the device is displayed in the list. For more information, refer to the wireless manual at the website www.olimpiasplendid.it

5b- Bluetooth

Make sure that Bluetooth works on your mobile device.

- 1 - Turn on Bluetooth on the phone and automatically locate the device on the “Add device” page of the app.
- 2 - Once the upload is complete, the name of the connected appliance can be changed (max 64 characters); the device is displayed in the list. For more information, refer to the wireless manual at the website www.olimpiasplendid.it

6-FINAL WARNINGS

This device complies with Part 15 of the FCC rules and contains license-exempt transmitters/receivers that comply with the license-exempt RSS of Innovation, Science and Economic Development Canada.

The user must fulfil two basic requirements in order to use the product:

- 1 - this product may not cause harmful interference;
- 2 - this product must accept any type of interference received, including those that could cause unwanted operation.

ALWAYS use the product in accordance with the instructions provided.

Changes or modifications to this unit not expressly approved by the party responsible for compliance may invalidate the user's authority to use the appliance. This device complies with the FCC radiation exposure limits established for an uncontrolled environment.

To prevent the possibility of exceeding the FCC radio frequency exposure limits, humans must be no closer than 20 cm (8 inches) to the antenna during normal operation.

Changes or modifications not expressly approved by the party responsible for compliance may invalidate the user's authority to use the appliance.

This appliance was tested and found to comply with the limits for a Class B digital device, according to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This appliance generates, uses and may radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a specific installation.

If this appliance causes harmful interference to radio and television reception, which can be determined by switching the appliance

on and off, the user is invited to try to correct the interference by taking one or more of the following measures:

- Reorient or reposition the receiving antenna.
- Increase separation between the equipment and receiver.
- Connect the appliance to a socket on a different circuit from the one to which the receiver is connected.
- Consult the dealer or an experienced radio and television technician for help.

The company shall not be held liable for any problems caused by the internet, wireless/wireless router and smart devices. Please contact the original provider for further help.
